INSIGHTS. GUIDANCE. SOLUTIONS.

Can this delicious slice of pizza solve the awkward and embarrassing problem that keeps up to 80% of men awake at night?

Read on and learn how you can...

✓ **Cut night-time visits to the bathroom in *half***

✓ **Pee 50% stronger...**

✓ **And empty your bladder fully *every* time!**

In as little as 4 weeks! ←

Dear Health-Conscious Friend,

If you're a man over 50, you're (literally) sitting on a ticking time bomb...in the most uncomfortable possible place.

And when this bomb "explodes" it can leave you impotent, incontinent, dripping, dribbling and in pain—robbing you of a restful night's sleep, a healthy sex life and your very dignity.

I don't care how old you are, sexless and incontinent is no way for a man to live.

But I want to share a solution that can help you avoid that awkward conversation...and that embarrassing "finger exam"...yikes!

In fact, in as little as four weeks you could be...

- Sleeping soundly without disruptive, late-night trips to the bathroom
- Emptying your bladder fully, with a strong stream and no embarrassing "dribbles"
- Controlling the urge to "go" whether you're in the car, at the movies, or at the dinner table
- Peeing without straining...finishing fully, and without the slightest twinge of discomfort

But the first step is *admitting* that you're a man over 50...and that, if you don't already wrestle with prostate problems, they're almost certainly right around the corner.

If you think I'm exaggerating, just take a look at the statistics.

According to the University of Rochester Medical Center:

> "Men over 50 have a 50 percent chance of having [prostate health concerns], while men over 80 have a 90 percent chance..."[1]

The National Institutes of Health (NIH) agrees:

> "[Prostate trouble] affects about 50 percent of men between the ages of 51 and 60 and up to 90 percent of men older than 80."[2]

So does Harvard Medical School:

> "Half of all men have an enlarged prostate by the time they reach age 60, and by age 85, 90% of

> men have an enlarged prostate."[3]

It's as plain as black and white—if you're a man over 50, you've got a 50/50 chance of living with prostate problems. And the cards continue to stack against you the older you get.

Yet in spite of the overwhelming evidence...even once symptoms start to cause problems, most guys do nothing.

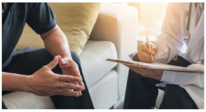
I get it. It's embarrassing. You don't want to talk about it. And those exams—yikes. The word "awkward" doesn't even begin to explain it.

But facts are facts—this will not go away on its own.

But there IS a solution. It's safe, natural, it goes to work fast, it's 100% discreet—no one needs to know about it but you.

And you don't have to subject yourself to awkward conversations or embarrassing medical exams

Maybe this sounds familiar.



It started with occasional discomfort "down below". Then it was the late night trips to the bathroom—getting up to pee, sometimes three or four times in a night.

Trips to the bathroom during the day became just as frustrating—a weak stream followed by messy dribbles and the feeling like you're not actually finished "going".

Yet, try as you might, nothing more will come out...for now...

For a tiny, little, walnut-sized gland, your prostate can stir up an awful lot of trouble.[1]

I know it's embarrassing. And, I know guys don't want to talk about it. But the research couldn't be clearer.

These things *don't* get better on their own.

So, if you want ironclad protection to ensure a lifetime of confidence, security, and control...

Let me introduce you to a safe, natural, triple-action solution, backed by more than 40, successful human clinical studies.

It starts with...

And it starts with...pizza?
Yes! Here's why...

Scientists have identified a powerful antioxidant carotenoid shown to reduce an important biomarker of prostate health, called prostate specific antigen (PSA), by more than 11% in just 6 months...

Plus...in one three-month study, 80% of patients reported...[4]

- Substantially less overall discomfort
- Less frequent trips to the bathroom
- A reduced sense of urgency when having to go
- An much easier time "getting started"

It also helped increase urinary stream and strength...

...and one of the richest sources of this prostate health powerhouse lies just below the cheese on that delicious looking slice of pizza.

You see, lycopene is where strawberries, watermelons, papayas and...*tomatoes* get their bright red color.

And while eating any of those delicious foods will give you *some* lycopene, as it turns out, lycopene is really hard for your body to absorb...

...*unless* you combine it with a fat (like olive oil) and heat it up (like the tomato sauce on that slice of pizza)!

Of course, you *could* eat pizza every day, but as attractive as that may sound to the pizza fans, that's hardly a recipe for good health.

You'd need about half a cup of tomato sauce, *every day*, to get enough prostate-supporting lycopene.[5]

Or you can read on and learn about today's most cutting-edge breakthrough in comprehensive prostate support.

It *starts* with lycopene, but you'll also get...

A rare, ancient Chinese herb, shown to help ensure YOU stay in control

Ling Chih, or more commonly known as reishi, is a rare medicinal mushroom with a dark, reddish cap and a yellowish-white underside, riddled with tiny pink spores.

It looks like something out of a fairy tale.

And it's only edible when it's very young and tender...making it even more rare.

It's been an important part of Traditional Chinese Medicine for more than 2,000 years, where it's known as the *herb of spiritual potency* and the *mushroom of immortality*.[2]

And in one clinical study, reishi outshined the placebo by 96%... after just four weeks

Double-blind, placebo-controlled studies are the gold standard in scientific research.

And when this *herb of potency* was tested against the placebo, the results were staggering.

Prior to the study, men answered an eight-question test called the International Prostate Symptom Score, or IPSS.

The IPSS allows men to indicate, on a scale of one to five, the severity of their symptoms: how often they have to go (there's one score for day time and another for night), urgency, comfort, if they have to strain to go, and the strength of their stream.

And after just four weeks, taking just 6 mg of reishi mushroom a day, the study group saw IPSS improvements that were 96% better than the placebo.

Just imagine, in as little as four weeks this ancient *herb of potency* can help you...

- Sleep soundly without disruptive, late-night trips to the bathroom
- Empty your bladder more fully, with a strong stream and no embarrassing "dribbles"
- Control the urge to "go" whether you're in the car, at the movies, or at the dinner table
- Start going without straining...and finish fully, without the slightest twinge of discomfort

Just imagine the relief knowing you'll sleep better...live with more confidence...maybe even reignite your sex life!

All without a single negative side effect.

Perhaps best of all?

No one ever needs to know. It's your secret.

No embarrassing conversations at the doctor's office...no trips to the pharmacy...no expensive, painful, procedures that can leave you limp and incontinent..

Safe, natural, and effective prostate support that goes to work in just weeks

But I'm not one to hang my hat on just one study.

In a second, similarly structured study, reishi did *even better*.

After 12 weeks, using the same IPSS test, study subjects showed a whopping 113% improvement over the placebo!

In other words, reishi's prostate-supporting power gets better and better over time.

Without side effects, and without any more worry about diapers, dribbles or painful, uncomfortable "stops and starts" when you're trying to go.

I'll show you how YOU can try this amazing prosate-protecting mushroom for yourself

But first allow me to introduce myself. My name is Lily Moran, President of Newport Natural Health.

We're a fast-growing nutritional supplement company with one goal: Helping you achieve optimal health and wellness.

The key to our growing success?

We pay attention to even the smallest, most important details—from choosing the absolute best sources for our ingredients, to responding to each and every question that comes through our customer service team.

I speak, personally, with the men and women who create our formulations and manufacture our products, ensuring that we're using research-backed dosages without ever skimping on quality.
But the initial feedback we've received for this exciting, natural, prostate health solution makes me all the more excited to share it with you.

> **"There is absolutely no question about the improvement I saw. Even my doctor was impressed. Within 2 weeks of taking [it], I noticed a difference!" – Dan C., WI**
>
> **"I have noticed an improvement in my health since taking Prostrate Plus. I am not having to get up 3 or 4 times during the night to go to the bathroom. I am enjoying a good night's sleep now."**
> **– Steve R., TX**

“I can tell my prostate is working so much better…and I can tell the difference when having intercourse.” – **Rick W., IL**

Most importantly, I want to hear from you—I want to know that the products we create are not just meeting but exceeding your expectations.

If we can do better, I want to know.

But I have every confidence that you’ll be just as amazed by this comprehensive, prostate health formula—using the exact forms and dosages used in studies.

Because reishi mushroom is only the beginning.

The FIRST-LINE prostate treatment in Canada and most of Europe…and it comes from a berry

Oddly enough, this powerful berry grows almost exclusively in the sandy, swampy, coastal lowlands of the southeastern United States.

Related to the palm, this hardy plant often lives to be 500 to 700 years old.

And while Health Canada, The Committee on Herbal Medicinal Products (European Union) and the German Commission E all designate it as a safe and effective treatment for prostate health…our medical community rarely even talks about it.

In one double-blind, placebo-controlled study, it was shown to help…

- Decrease night time bathroom visits by almost *half*…while placebo saw only a 15% change
- Improve urinary flow by 50%…while placebo saw only 5% change
- Reduce residual urine (what’s left in your bladder after peeing) by 42%…the placebo group actually got 10% *worse*

In fact…

A full 88% of patients who took this powerful berry extract reported their symptoms either improved or *greatly* improved

NOT ONE patient in the placebo group claimed “greatly improved.”

Chances are you’ve heard of saw palmetto—but perhaps you didn’t realize it was actually a berry with worldwide acceptance and an impressive history of prostate healing success.

Knowing what’s at stake, it’s a no-brainer.

Doesn’t it make more sense to put your trust in a natural, healing berry extract with stacks of clinical support showing safe and effective prostate support…than some expensive, side-effect-laden chemical concoction whipped up in a lab?

Wouldn’t it be great to forget all about you prostate woes, in as little as one month?

Well, this concentrated, standardized saw palmetto berry extract, may be just the thing you’re looking for.

In yet another double-blind, placebo-controlled study, of the patients in the study group …

- More than 30% reported less pain when urinating
- 11% saw a reduction in day time urinary frequency
- 33% enjoyed a reduction in night time frequency
- The strength of urinary stream increased by almost 30%

And, more than 71% of patients reported that their prostate symptoms were now satisfactory or better… after just 30 days.

Combine lycopene and saw palmetto with the power of reishi and you have the recipe for prostate health, comfort and the confidence that you deserve

Wake up every morning, refreshed and well-rested, knowing you’re in control of your urinary urgency… knowing you won’t fall victim to embarrassing accidents or post-urination dribbles…knowing you’re promoting your prostate and urinary health safely and naturally.

You may even notice things start to heat up in the bedroom too!

Without dropping a mint on some expensive prescription…and without fear of side effects…

In fact, in two clinical studies, comparing saw palmetto with today’s most common mainstream standbys, saw palmetto performed just as well.

And, in a third study, it proved itself even more effective—without a single reported negative side effect in all three studies.

That's why these are the key ingredients in a comprehensive breakthrough in natural prostate health called Prostate Plus

The ingredients are backed by more than 40 human clinical studies combined, proving that, in as little as 30 days...

- You're in control of your urinary urges
- You're in control of "starting and stopping"
- You're in control of when you go to sleep and when you wake up in the morning
- You're in control of emptying your bladder fully and comfortably, without straining

That's because the key ingredients in Prostate Plus deliver triple-action protection, addressing the three primary reasons our prostates give us grief.

Lycopene and reishi work by reducing the production of an enzyme called 5-alpha reductase. This enzyme converts healthy testosterone into dihydrotestosterone (DHT).

Saw Palmetto extract works by helping to lower DHT and another important substance called epidermal growth factor (EGF).

Both DHT and EGF can lead to abnormal prostate growth, especially around the urethra.

That means, by reducing them naturally...

You'll enjoy less obstruction when you're trying to go...
Less pressure on your bladder...
And less straining to go...

And no one needs to know you're taking it, but you. It's safe, effective, it goes to work fast...and it's 100% discreet.

This triple-action formula has *everything* you need to feel comfortable, confident and in control of your prosate and urinary health.

And yet, Prostate Plus *still* offers you more support, more confidence, and more control with...

This unsung hero of the vitamin world—shown to boost testosterone by up to 25%

Testosterone plays a huge role in everything that makes men, MEN.

When levels begin to fall, we start to get soft around the middle—the dreaded beer belly. We lose muscle tone and strength, our libido takes a dive and, along with it, our confidence and *swagger*.

It isn't really news that Americans tend to be deficient in vitamin D3.

Known as the "sunshine vitamin", our fear of skin damage, cancer, and our reliance on sunscreen, present a huge deterrent to our body's ability to use the sun's ultra-violet rays to create vitamin D3 naturally.

And when researchers looked at the vitamin D3 levels of men with prostate troubles, 89% of them had *insufficient* vitamin D3 levels. And 55% were outright deficient.

In one study, men with both low levels of vitamin D3 *and* testosterone received 2,333 IU of vitamin D3 every day for a year.

At the end of that year?

Not only were vitamin D3 levels right in the normal range...but their testosterone levels had increased by 25%!

Healthy testosterone levels can help...

- Improve your mood, energy, and confidence
- Promote strong, toned, muscles
- Boost your sex drive and libido

It may even help eliminate some of those unwanted pounds around your gut!

And, rounding out this incredible formula are the vital minerals zinc and selenium.

Your prostate contains more zinc than any other organ in your body.

And studies have shown that men with the highest intakes of zinc and selenium have the lowest risk of prostate troubles.

Protect your prostate, take control of your urinary health and avoid embarrassing accidents—guaranteed

Fast, safe, effective and completely discreet, Prostate Plus is doctor formulated to offer triple-action prostate support.

reishi, saw palmetto and lycopene—each at clinically studied doses—help protect and support your prostate health by:

- Halting inflammation
- Slowing the conversion of testosterone to DHT…known to increase prostate size
- Reducing production of EGF…shown to spur prostate growth

Plus the added protection of plant sterols and vitamin D3 to promote healthy urinary function and testosterone levels.

In total, the ingredients in Prostate Plus are backed by more than 40 human clinical studies showing that, in as little as 30 days you can…

- Sleep soundly and comfortably through the night—without continuously waking up to pee
- Empty your bladder fully and comfortably—with a powerful stream and no straining
- Control your need to go—in the car, on a plane, at dinner or at the movies—no accidents, no dribbles, no *worries at all*
- Live with the confidence, security and comfort that comes with a healthy prostate—knowing *you're* in control

You may even see a boost in your sex drive and libido!

But you don't have to take my word for it.

Prostate Plus is backed by a three-month, 100% customer satisfaction guarantee

That means, you have a full 90 days to put Prostate Plus to the test.

Most of the studies I've shown you took place over the course of just a month or two.

But everyone's body and expectations are different. So, I'm giving you an extra-long, three month guarantee.

If you aren't sleeping more soundly through the night—with fewer late-night trips to the bathroom…

If you aren't emptying your bladder more fully, with a strong stream and less straining…

If you aren't feeling more comfortable, confident and in control…

If you aren't completely convinced that Prostate Plus is the comprehensive prostate health solution for you…

Just send back your bottles within the next three months and we'll refund every penny (less shipping).

You have absolutely nothing to lose!

And remember, every single shipment is backed by our three-month 100% Customer Satisfaction Guarantee!

In other words, you have nothing at all to lose.

And a lifetime of ironclad prostate health and protection—confidence, control, and security—to look forward to.

But no one can take care of this but you—YOU have to act now.

If you're over 50, the cards are already stacked against you. And with each passing year, your chances of prostate troubles continues climbing.

You already know what being "too manly", waiting around for prostate problems to disappear on their own, can lead to.

So why wait? Why take that chance?

Put Prostate Plus to the test. Give it at least a month—preferably three months—and feel the difference for yourself. Remember, you have a full three months to try it, absolutely risk-free.

Don't put this off. Try Prostate Plus now.

To Your Health and Wellness,

Lily Moran

President & Publisher, Newport Natural Health

P.S. Trouble peeing? Making late-night trips to the bathroom? That's just the beginning and a sure-fire sign that your prostate needs powerful, natural support and protection. Prostate Plus offers triple-action protection, shown to help you take control of your prostate and urinary health—reducing night time and day time frequency, giving you control of your urgency, so you can start going without straining and empty completely…starting in as little as 30 days. Prostate troubles never disappear on their own. You have to take action. Get your risk-free supply of Prostate Plus now.
