

This orange-flavored “candy” is the most delicious way to fuel your heart and super-charge your energy...

Without swallowing a single pill!

Dear Health Conscious Reader,

It's a little smaller than a dinner mint.

It's slightly sweet...slightly tart...and with just a couple of chews, it dissolves in your mouth like an orange-flavored crème candy.

Only this “candy” isn't candy at all.

It's a powerful, heart-fueling, age-defying secret, backed by STACKS of clinical research, showing that this tiny, chewable, orange-flavored “candy” can help:

- **Boost your strength, energy and endurance**—this stuff literally fuels the tiny energy generators in every cell in your body.
- **Promote healthy blood pressure levels**—I'm talking about real healthy blood pressure support in as little as three weeks.
- **Slow the effects of aging**—its powerful antioxidant properties are found in every cell in your body and it's up to 30 times stronger than vitamin E.
- **Refill your energy stores** after activities—whether that means grocery shopping or marathon running, this compound even helps Olympic cross country skiers recover faster.
- **Protect your heart and cardiovascular system**—your heart uses this “candy” more than any other organ in your body. It's the “gas” that keeps your motor running long and strong.
- **Support healthy weight loss**—this exciting compound actually helps your body burn more fat during exercise.
- **Ensure healthy, young-looking skin**—help protect you from skin-damaging free radicals and helping restore your skin's natural moisturizers.
- **It even helps ensure healthy gums**—good oral health is always important, but healthy gums and strong teeth become even more so as we get older.

And best of all, there are no pills to swallow.

You'll actually look forward to this delicious orange treat at the start of each and every day

You won't believe that something so simple and delicious could have such a powerful and important impact on your heart, your energy and your overall well-being.

That's why I've been recommending it to all of my patients for years.

I am the Founder and Medical Director of the Center for New Medicine in Orange County, California. One of the largest integrative medical practices in the country.

During the earliest days of my medical practice, I realized that there were serious flaws with the mainstream approach to health care.

Time and time again, I watched patients get sicker and sicker at the hands of “standard” protocols and medications, while true healing was completely overlooked.

That's why I've devoted my career to correcting the nutritional imbalances that are often at the root of today's most common health challenges.

And that's why I'm writing to you.

Because this “candy” is actually a unique form of a vitamin-like compound known as Coenzyme Q10 (CoQ10).

But this is no ordinary CoQ10...

Chew Q10 is a form of CoQ10 that's not only 300% more absorbable in your body than any other form available today—it's delicious!

CoQ10 plays a key role in cellular respiration and the production of adenosine triphosphate (ATP)—the fuel that actually powers each cell, organ and system in your body.

In other words, CoQ10 is the gas that fuels your body.

Walking, talking, sleeping, breathing, eating—everything you do requires energy. And, when it comes to each and every cell doing its job, CoQ10 is the single most important source of it.

So if you've noticed increased fatigue, muscle weakness, lethargy, a foggy mind and a crummy mood...chances are you're running low on CoQ10.

Because, the number one reason we run low on CoQ10 is also 100% unavoidable...aging.

As we get older, our bodies simply produce less and less of it. And only trace amounts can be found in even the healthiest of diets.

Plus, if you're taking a cholesterol-lowering statin drug, your CoQ10 stores are depleted even more!

In fact, studies show a 40% drop in CoQ10 after just three months on a statin. The *only way* to ensure you're getting enough heart-fueling CoQ10 is with a daily supplement.

You've probably heard of CoQ10 before... but you've probably never heard of this CoQ10.

Pure CoQ10 doesn't dissolve in water...and it barely dissolves in fats. Which means pure CoQ10 is not easy for your body to absorb.

So, until recently, one of the biggest challenges was getting enough CoQ10 into your blood stream to do its important work.

- Infusing your body with lasting, natural energy
- Fueling your daily activities, big and small
- Protecting your heart and cardiovascular system
- Supporting healthy blood pressure levels
- Protecting your body from age-accelerating free radicals

In clinical studies, *regular* CoQ10 had a 0 – 3% absorption rate. So getting enough CoQ10 *used* to mean lots of pills at high doses over long periods of time.

The CoQ10 you'll get in each delicious, daily Chew Q10 tablet is 90 – 100% absorbable...without choking down a single pill!

That's exciting, because studies show that 100 milligrams of CoQ10 per day can help:

- Support truly healthy blood pressure support in as little as three weeks
- Boost your overall power and endurance by up to 16% in as little as eight weeks
- Burn more fat during exercise to improve fitness and help you meet your weight loss goals
- Protect and power your heart and cardiovascular system
- Ensure healthy, youthful-looking skin by producing natural moisturizers

So, even if you're already taking a daily CoQ10 supplement, chances are it's not nearly as simple and delicious as Chew Q10.

But, more importantly, chances are you're not absorbing nearly as much as you need.

And, if you're taking a cholesterol-lowering statin, your daily CoQ10 is even more important, to ensure a healthy heart and muscle function, combat fatigue and protect every cell in your body from free-radical damage.

But you don't have to take my word for it.

Chew Q10 will help you look *and* feel amazing...inside and out...guaranteed or your money back

I know the science, I've read the studies and I've seen what CoQ10 has done for my patients *and* their families.

Transforming sluggishness and fatigue into energy and vibrance...

Elevating heart and cardiovascular health...

Protecting against the effects of premature aging...

But what's most important is what Chew Q10 can do for you—how it makes *you* feel.

That's why I'm giving you a full 6 months to try Chew Q10 for yourself absolutely risk free

Wake up each morning and enjoy the tasty orange treat that packs up to 300% more heart-fueling, youth-infusing, antioxidant power than any other CoQ10.

Without swallowing a single pill.

And day after day you'll notice the difference that Chew Q10 can make...

“As you feel more energized and vibrant...”

As you cross taxing chores and errands off your to-do list with ease...

But if you aren't 100% delighted. If you aren't completely convinced that Chew Q10 is infusing every cell in your body with the fuel they need to keep you on top of your game, morning, noon and night...send it back for a full refund (less shipping), no questions asked.

It's that simple.

I take your trust very seriously and this is my way of making sure there's nothing stopping you from trying the most potent (and delicious) form of CoQ10 I've ever offered.

So, don't wait another moment. Do something powerfully simple for your heart and your body, without choking down a single pill.
