Restless Legs Syndrome Symptoms

Restless Legs Syndrome is an overwhelming desire to move the legs and is usually caused by uncomfortable or unpleasant sensations in the legs. The sensations can occur during periods of inactivity and become more severe in the evening and night. The sensations are relieved by movement of the limbs. Restless Legs Syndrome may cause difficulty falling or remaining asleep, which often leads to tiredness or fatigue.

Product Description

Our Restless Legs Cream can be massaged into your legs and feet to relieve and soothe the symptoms of restless legs syndrome. Scientifically formulated to allow for absorption of specific vitamins and minerals that provide relief from those painful and annoying sensations. Therapeutic formula is infused with essential oils for relaxation so you can rest comfortably. 4 oz. jar.

Ingredients & Purpose

Ingredient	Purpose
Vitamin E	For symptoms of RLS, cramps, and muscle spasms
Lavender Oil	For the relaxation or relief of muscle spasms and twitches, also calms and relaxes the body to help with sleep
Magnesium Ascorbyl Phosphate	For symptoms of RLS, paraesthesia of the extremities, muscle twitches, and nocturnal leg cramps, and for symptoms of periodic leg movements (PLMS) and PLMS associated with arousal (PLMS-A)
Propylene Glycol	Used as a penetration enhancer to allow ingredients to penetrate into the skin and decreases the barrier resistance

Water, Aloe Barbadensis Leaf Juice, Polyacrylamide, C13-14 Isoparaffin, Benzocaine HCl, Magnesium Ascorbyl Phosphate, Lavandula Angustifolia (Lavender) Oil, Salvia Officinalis (Sage) Leaf Extract, Cananga Odorata Flower Extract, Anthemis Nobilis Flower Extract, Tocopheryl Acetate (Vitamin E), Folic Acid, Retinyl Palmitate Vitamin A, Propylene Glycol, Laureth-7, Diazolidinyl Urea, Methylparaben, Propylparaben.

Directions

- Generously apply and massage into legs and feet daily.
- Reapply if necessary.
