The Real Secrets of the French Paradox *Revealed*

**Harness the fullest power of
red wine's incredible secrets**

Introducing the powerful pill that delivers not one
but all of red wine's amazing nutrients without
drinking up to 10 bottles of red wine every day.

Learn the *real* secrets behind the French Paradox and how this perfect nutrient combination can help you:

- ✓ **Look younger**—astonish your friends and family...p. 11
- ✓ **Enjoy boundless energy**—from the golf course to the dance floor...p. 6
- ✓ **Control cholesterol, blood pressure and blood sugar levels naturally**...p. 5
- ✓ **Flexible, comfortable joints** allow you to walk, run and dance to your heart's content...p. 7
- ✓ **And so much more...**

PLUS: Claim two cutting-edge natural health reports absolutely FREE!

Continued on page 2 →

Youth and vitality...strength and energy... complete health, protection and immunity... *It's never been easier!*

Dear friend,

How would you like to eat whatever types of food you want? Without worrying about getting fat or the dangers of obesity.

How would you like to feel vibrant and energized? Without stepping foot in the gym.

It's happening for thousands of people. And starting today, it can happen for you too.

They call it the French Paradox.

Perhaps you've heard the term before. It's the theory that the French get to eat rich, fatty unhealthy diets. Yet they stay slim and healthy.

They smoke cigarettes, yet they look younger than their age. They even enjoy a remarkably low risk of heart disease.

What's their secret?

It all comes down to their love of red wine and the incredible combination of super-nutrients locked into every glass

Science has actually proven it.¹

But not everyone enjoys wine as much as the French. And still others prefer not to drink

**Don't be fooled!
Resveratrol alone
is not enough**

"...it must be remembered that the beneficial effects of red wine consumption may not be attributable to resveratrol alone, but rather the interaction of multiple polyphenols."

—James M. Smoliga, DVM, PhD et. al.

Potential Benefits of Resveratrol Supplementation for Optimizing Health and Chronic Disease, pg 362

alcohol at all.

So manufacturers across the country have worked furiously to harness the power of red wine in a convenient, easy-to-take supplement.

And some of them have come close—very close. But here's the catch...

Many supplements hone in on just one of the incredible nutrients found in red wine

And that's just a fraction of the story!

You see, the French Paradox is real.

And it just might be the untold, untapped secret to unparalleled health, vitality and protection.

Emerging science shows that it may even extend your lifespan!

But a single nutrient can't duplicate the benefits of red wine.

It takes a combination of nutrients, assembled by Nature herself, working together in perfect harmony.

And for the first time ever, you can have access to this perfect combination—the *real secret* behind the French Paradox—without having to drink up to 10 bottles of red wine every day.

A safe, simple, inexpensive way to harness all of red wine's powerful, health-boosting nutrients

I'm talking about...

Using the whole grape means way more than just resveratrol. You get five of the most powerful health-boosting nutrients nature's ever created!

What makes the French so healthy?

According to the World Health Organization, there are 24% more smokers in France than there are in Canada. And 16% more than there are in the U.S.

Yet the French enjoy a staggeringly lower incident of heart disease. How do they do it?

Preliminary studies show that it may be the cardio-protective properties of their beloved red wine. And you can get that same protection safely and easily with the *Red Wine Pill*.

Turn to page 15 now and order a risk-free trial supply of the *Red Wine Pill* today!

- ▶ Feeling like 10 years have vanished every time you look into the mirror
- ▶ Impressing your kids or grand kids with your boundless energy
- ▶ Pleasing your doctor next time he checks your blood pressure and cholesterol
- ▶ Slowing the premature aging process and protecting yourself from dangerous free radicals

▶ And so much more...

Without downing gallons upon gallons of wine...without the calories and without the excessive alcohol.

Starting today, you can experience every youth-recovering, heart-supporting, age-defying, energy-boosting benefit of red wine for yourself.

So just what is this incredible secret? I'll get to that in a minute.

But first, let me tell you about

The one powerful nutrient everyone's been raving about... and why it's only part of the story

Have you heard of *resveratrol*?

It's one of the nutrients found in red wine and it's been making some serious headlines since 2006. Why?

Because scientists discovered that when fat, unhealthy mice supplemented their diets with resveratrol, they actually lived as long, or longer, than healthy mice.

It was, and still is, an incredible discovery. But, based on this one study, many people have assumed that resveratrol alone can make humans live longer too...even if they're fat and unhealthy.

But here's the rub.

You would have to drink about 88 gallons of red wine to match the dose fed to these mice!

Make no mistake. Resveratrol is an incredible nutrient.

There is research stacked to the ceiling

(continued)

¹Resveratrol: Natural Standard Monograph, pg 1

showing that it can:

- Maintain healthy cholesterol and blood pressure levels
- Support healthy blood sugar levels
- Boost energy and endurance
- Protect against free radical damage
- Even act as a natural anti-inflammatory

But it would take 1500 mg. of the purest, most concentrated resveratrol, every day, to come close to the amount used in the initial mouse study.

But more importantly, research shows that your body has a hard time absorbing resveratrol when it's all by itself.

That means you'd have to eat boatloads of the stuff to reap the same benefits those mice did!

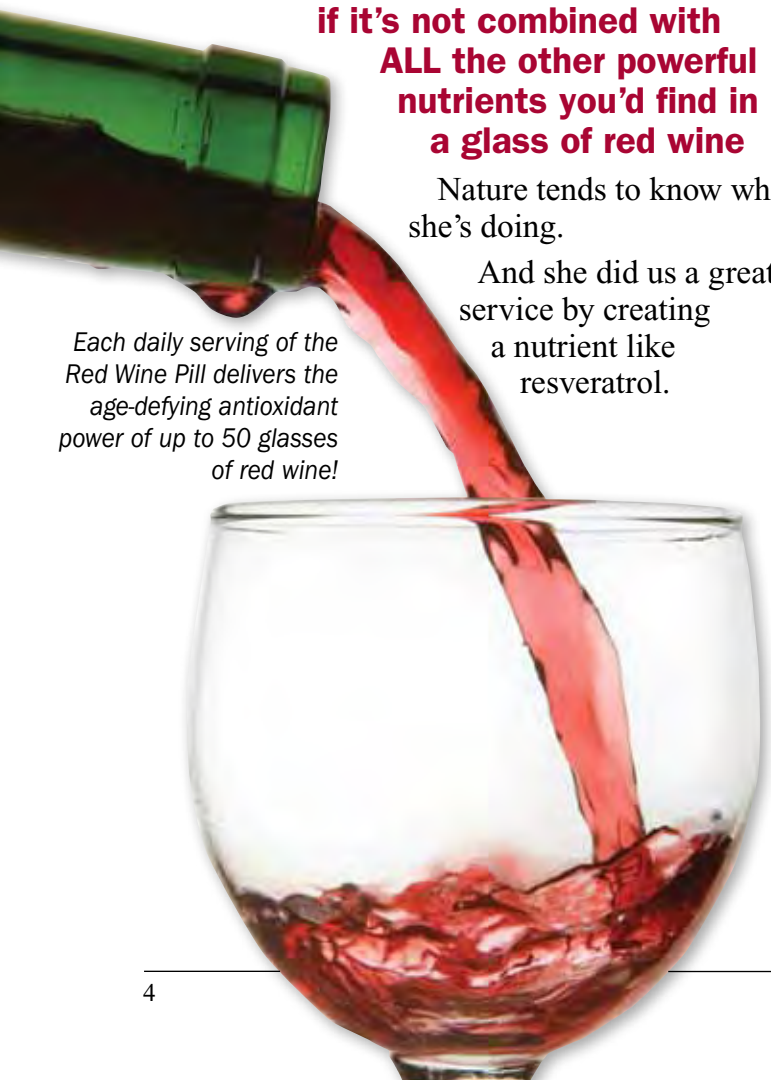

In other words...

Resveratrol is almost worthless if it's not combined with ALL the other powerful nutrients you'd find in a glass of red wine

Nature tends to know what she's doing.

And she did us a great service by creating a nutrient like resveratrol.

Each daily serving of the Red Wine Pill delivers the age-defying antioxidant power of up to 50 glasses of red wine!

“The consumption of antioxidants is now moving from simply being a part of an individual’s healthy diet to being recognized as a therapeutic strategy in disease.”

—S.L. Nuttall

Journal of Clinical Pharmacy and Therapeutics (1998) 23, 388

But there is mounting evidence to prove Nature didn't intend resveratrol to work all by itself.

You see, red wine is made from the entire grape plant—the skin, the flesh, the seeds and the stems.

Each part delivers its own set of healthy nutrients. Not just resveratrol, but antioxidant polyphenols, flavonols, anthocyanidins and catechins as well.

And every one of those nutrients has its own healthful benefits. But when they're combined...

These nutrients create a powerful health-boosting effect far greater than the sum of their parts

If you're like me, you enjoy a glass of red from time to time. Few luxuries are healthier and more enjoyable.

But whether you're a wine drinker or not, now there's a safe, simple way to experience the combined nutrient power found in every glass.

A way for you to take full advantage of the French Paradox

We set out to recreate all of the nutrient benefits of red wine.

So, not only are you getting a healthy dose of resveratrol, but

You're getting all of the amazing nutrients you'd find in the grape seeds, grape skins, grape leaves and more!

I'm talking about harnessing the fullest power

of the French Paradox.

Starting with...

- ✓ Resveratrol's powerful antioxidant power to keep you looking and feeling years younger
- ✓ The powerful nutrients locked into grape seeds and skins can help protect your heart, support healthy cholesterol, blood pressure levels and more
- ✓ Protection against inflammation from quercetin—a powerful antioxidant in its own right
- ✓ Plus a combined effect that can help support healthy blood sugar, boost the immune system and more!

I call it the **Red Wine Pill**.

But give me just another minute and you'll call it the closest thing to a natural health miracle you've ever heard of.

Take advantage of the French Paradox and protect your heart for life!

Think about the typical French diet—buttery croissants, creamy cheeses and rich, luxurious desserts.

It's hardly the picture of a heart healthy diet, right?

Yet, according to a 2008 report published by the *American Heart Association*, the incidence of coronary heart disease death is 95% higher in Canada and 138% higher in the US than in France.

What's the story?

Well, scientists started to take note of the amount of red wine the French drink...

It was no surprise to find that the nutrients in red wine work wonders to protect your heart

A 2002 animal study showed that the

Call Today!

nutrients found in red wine can have a significant effect in the maintenance of healthy cholesterol levels.

It can help maintain healthy triglycerides levels as well.²

But when it comes to heart health, cholesterol isn't the whole story.

So scientists looked at blood pressure as well. And a 2004 study confirmed their suspicion.

Forty study subjects with high blood pressure saw significant improvement in their blood pressure after consuming the nutrients found in red grapes.³

Studies have also shown that these same nutrients can help maintain a healthy heart rate during exercise—putting less stress on the heart.

Of course, not everyone's going to drink a bottle of wine and go for a jog.

But these studies are proof-positive that...

The Red Wine Pill might be the greatest way to protect your heart

Of course, this is just a small sampling of the studies that are out there.

I wish I had time to tell you about all of them.

But I just wanted to show you how the nutrients found in the *Red Wine Pill* can work together to do some amazing things for your health.

And in another minute, I'll show you how to try it for yourself risk-free.

But first, let me ask you a question...

When was the last time you left your kids, or your grand kids, in the dust?

Have you ever found yourself winded by the time you climbed a few stairs?

Or perhaps after walking into your house with a few bags of groceries?

Well, once you put the *Red Wine Pill* to work, you'll never have to worry about energy again.

Shock your wife with a night out on the dance floor...spend a day in the park with your kids... baffle your buddies when you're ready to play 18 holes and then some.

And with each passing day you'll notice more strength—more energy.

Don't be surprised if your entire outlook on

“The Red Wine Pill Is Like Having Eight Breakthroughs in One!”

—Victor Marchione, M.D.

The *Red Wine Pill* does it all:

- 
1. Look 10-20 years younger...
 2. Feel boundless all-day energy...
 3. Super-charge your immune system...
 4. Relieve stiff, cranky joints...
 5. Enjoy healthy cholesterol levels...
 6. Maintain healthy blood sugar levels...
 7. Feel trimmer and leaner...
 8. And more!

life takes a change for the better.

Why?

Because, not only can the *Red Wine Pill* protect your heart in the same ways that red wine does.

The Red Wine Pill can boost your strength and endurance

Imagine being able to run twice as far as you used to.

That's what happened when mice were fed resveratrol—they were able to run twice as far as those in the control group.⁴

Running's not your bag? No problem.

Just imagine what you could do with that energy

You see, the nutrients found in the *Red Wine Pill* can actually increase the number of power generators in every cell in your body.

The more generators you have, the more real, natural power you have.

It's like harnessing a few extra horses to your buggy

The more horses you have pulling the load, the longer they can go before they get tired.

And I'm talking about real, natural energy.

Unlike coffee or other stimulants, that can give you a quick jittery "buzz," the nutrients in the *Red Wine Pill* actually help your body work more effectively and efficiently.

That means long-lasting, sustainable energy

And more importantly, it means no "crashing" or drowsiness.

Just boundless energy to support your day without interfering with your sleep at night.

But the magic of the *Red Wine Pill* doesn't

"We have a lot more get up and go!"

"My husband and I have been on *Red Wine pills* for about 6 months now. We have a lot more get up and go, we don't get tired now as easy. My energy has just about doubled. No problem staying in the garden for two hours, before the pill, I did good at one hour."

—M.H., Waterhen, MB

end there.

Not by a long shot.

Would you believe this potent combination of red wine extracts can also help you...

Make Fred Astaire look like the Tin Man on the dance floor

What good is your newfound energy if you can't use it?

No good at all.

But the nutrients in *Red Wine Pill* have yet another important job to do.

This natural anti-inflammatory can help keep you comfortable...so you can stay flexible and on the go

Inflammation is your body's natural response to injury.

But sometimes your body goes a little overboard. And when it does, your joints are usually the first to know about it.

That's where the *Red Wine Pill* comes in.

According to seven separate studies, conducted between 1999 and 2004, one of the nutrients in the *Red Wine Pill* can actually help control your body's levels of COX-1 and COX-2.⁵

(continued)

⁵Resveratrol: Natural Standard Monograph, pg5

⁶Resveratrol/SRT501 pg 291

⁷Resveratrol improves mitochondrial function and protects against metabolic disease by activating SIRT1 and PGC-1a, Cell (2006) 127 (6) 1109-1122

In other words, the *Red Wine Pill* stops the chemicals that spur inflammation into action

This isn't *just* good news for your joints.

Emerging evidence continues to confirm the role of inflammation in dozens of today's most challenging health concerns.

That means the *Red Wine Pill* can help protect you from every one of them!

It can even help...

Keep your blood sugar levels right where you want them

It's one of the biggest and fastest-growing concerns in modern health.

And as processed sugar-heavy foods continue replacing whole, nutritious foods in our modern diet, maintaining healthy blood sugar will become increasingly difficult.

But the *Red Wine Pill* has the answer for blood sugar as well

As a health-savvy person, you know your doctor wants you to stay fit, trim, and healthy.

Send for your RISK-FREE supply of *The Red Wine Pill* today and get these two cutting-edge reports absolutely FREE!

Turn to page 15 and order now!

And if you've managed to stay in good shape, congratulations. You're in a shrinking minority.

But the growing obesity problem is no secret. And it goes hand in hand with the growing number of blood sugar concerns.

The first thing doctors are recommending is a low calorie diet.

It's the first order of business for maintaining healthy blood sugar levels.

And I would never suggest that you disregard a doctor's orders. But...

Resveratrol can actually mimic the effects of a low calorie diet

Without having to give up all of your favorite foods.

You see, scientists fed a group of mice a high calorie diet along with a highly absorbable form of resveratrol.

And when they ran tests on the mice's metabolism, their blood sugar was lower and they showed more sensitivity to their body's own insulin.⁶

What's more, a 2006 study not only confirmed these findings. But showed that resveratrol can actually increase overall metabolism.⁷

In other words...

The ingredients in the *Red Wine Pill* can help you feel fantastic—without sweating for hours in the gym

Now can you see why I said the *Red Wine Pill* was the closest thing to a natural health miracle that you've ever heard of?

As far as I know, there are only two places where you can find all of these powerful, health-nurturing, antioxidant wonders.

One is in a delicious bottle of red wine.

The other is in the *Red Wine Pill*.

You get all the age-defying, health-boosting power of up to 10 bottles of red wine in each daily serving of the *Red Wine Pill*

One daily serving.

Dr. Marchione combined the latest clinical research to create this natural breakthrough. That's why each Risk-Free order of the *Red Wine Pill* is back by his unconditional "10 Years Younger" guarantee. So don't wait. Turn to page 15 and order now. Or, for fastest service, call 1-866-217-7240. Call today!

And you would need to drink up to 10 bottles of red wine a day just to get the same amount of resveratrol locked into every daily serving of the *Red Wine Pill*

But the *Red Wine Pill* is so much more than resveratrol.

That's because, just like red wine, we use

"My life has really improved"

"I am using the *Red Wine Pill*...my life has really improved a lot, and I tell people around me about your fabulous products."

—C.M., Gatineau, QC

every part of the grape vine.

The pulp, the seeds, the skins, the stems, the leaves—nothing goes to waste.

So unlike cheap knock-offs and single-nutrient supplements...

You're actually getting the same array of nutrients in every glass of wine

Only you're getting more of them—every single day!

You're getting everything your body needs to:

- ▶ Maintain healthy cholesterol levels
- ▶ Maintain healthy blood pressure levels
- ▶ Boost your energy
- ▶ Protect and support flexible joints
- ▶ Maintain Balanced blood sugar levels
- ▶ And so much more...

(continued)

And since I don't recommend you drink 10 bottles of wine every day...

The Red Wine Pill is the perfect solution to today's most pressing health concerns

And in just a few seconds, I'm going to show you how to try it absolutely RISK-FREE.

Plus, claim your two FREE reports, just for trying it.

But I want to tell you about one more incredible benefit of the *Red Wine Pill*.

And believe me, I've saved the best for last.

Because the powerful antioxidants in every capsule can actually...

Reverse the effects of premature aging—smooth out those fine lines and restore a more youthful appearance

Collagen is the building block of healthy skin.

It's the spongy layer just below the surface of the skin that keeps it supple and gives it its elasticity.

As we age, our bodies stop producing as much collagen.

“All I take is the Red Wine Pill!”

“Since I have started to take the *Red Wine Pill*, I do not have to take a lot of prescription pills—it was a handful every morning! Now all I take is the *Red Wine Pill!*”

—J.S., Listuguj, QC

And the collagen we do have begins to break down. Leaving those fine lines and wrinkles—a telltale sign of aging.

But the Red Wine Pill has a solution that can literally turn back the hands of time

How?

Well, a 1998 Japanese study showed that resveratrol can kick the body's collagen production back into high gear!

So the next time you look in the mirror, don't be surprised if those crows' feet seem to take a walk!

**About Bel Marra Nutritionals—
A Leader in High-Quality Natural Solutions**

At Bel Marra Nutritionals, Inc., we're committed to your health and well-being. We are proud to be a leading direct-to-consumer natural health product company.

We've built our solid reputation by offering high-quality vitamins and nutritional supplements in proprietary formulations designed to address specific health concerns. The ingredients in our products are backed by scientific evidence.

You'll be glad to know that the employees of Bel Marra Nutritionals are as concerned about quality and value as you are. Every product is tested for safety, quality, and purity at every stage of the manufacturing process. Bel Marra Nutritionals products are produced only in government-approved facilities, going that extra mile to ensure our health-conscious customers are getting only the highest-quality products.
