

**Do you ever feel like dark clouds keep following you around?**

## Kick those blues, lift your spirits, and banish those gloomy feelings

**Starting in as little as 2 weeks!**

Dear Friend,

The most valuable, sought-after herb on the planet has been clinically proven to help you kick the blues...overcome sadness...chase away those dark clouds...and lift your spirits.

We all feel down and out from time to time.

But for some folks, bouncing back isn't so easy. People say, "just snap out of it" or "why can't you just be happy?"

If only it were that easy. Right?

Well...there's still no magical happiness pill...no instant positivity switch...and, as a doctor, I know full-well it's *not* just a matter of "snapping out of it."

But I DO have some good news for you.

There's a bright red herb, native to southwestern Asia, that's gone toe-to-toe against nearly every mainstream "blues lifter"...WITH SOME *REALLY* EXCITING RESULTS.

### Kiss that funk g'bye...wake up revived, refreshed and inspired by each new day

Does it sometimes feel like there's a dark cloud following you around?

I'm talking about more than having a bad day or occasional blues.

I'm talking about weeks on end where you're just feeling unmotivated and uninspired. You *want* to snap out of it...but try as you might, finding a bright spot in your day becomes an ongoing challenge.

Left unaddressed, these kinds of feelings can affect your job, your relationships, your sex life—it's a horrible feeling.

But please know...

### IT'S NOT YOUR FAULT!

#### And there IS a safe, natural solution that can brighten your days, restore your smile, and lift those dark clouds, for good

Native to southwestern Asia, the legendary crocus flower has been cultivated and used by many different cultures across countless civilizations for more than 3,500 years.

But it's not the flower itself that's given the crocus its "legend status."

If you look into the center of the lavender-colored petals, you'll see three tiny red hairs. These vivid, crimson-colored stigmas, also called threads, are known as saffron.

**Long used as a seasoning, a dye, a fragrance and a medicine, pound for pound, saffron is literally worth more than gold.**

And for good reason.

It takes about 70,000 crocus flowers, or 210,000 threads, to yield just a pound of saffron (we're talking about a football field filled with crocuses). And each delicate thread has to be hand-picked so it isn't damaged.

PLUS, in clinical studies, when compared to a placebo and even when it was tested against the mainstream's most common mood-boosting solutions, saffron shows unbelievable promise for:

- Lifting tired, cranky spirits
- Restoring a sunny positive outlook
- Chasing away even the most stubborn blues
- Promoting sexual lubrication in women and erectile function in men
- Ensuring healthy, mood-related sexual function (in both men *and* women)

Without a single reported side-effect.

So, if you've been riding the roller coaster of mainstream solutions—the ups and downs, the frustration and exasperation...

### BRAND NEW: Saffronex, could be the mood-lifting, blues-banishing solution you've been waiting for

As the name would imply, Saffronex starts with a highly standardized, proprietary extract of saffron called TriNeuroPlex™.

But, to keep things simple, we'll just call it saffron extract.

In four double-blind clinical trials, this powerful extract was studied alongside today's most common mainstream solutions.

And, in every single study, SAFFRON PROVED JUST AS POWERFUL!

In as little as six weeks, this saffron extract was able to help promote a healthy, positive mood—banishing the blues, removing the doom and gloom and restoring an upbeat outlook.

All without a single negative side-effect.

### And in the placebo-controlled studies, this saffron extract was a mood-enhancing warrior!

So, even if you've tried other solutions, only to be left in the doldrums...

If you find you're in a long-standing funk...

If your grouchy mood and negative outlook are impacting your job, your relationships, or your ability to enjoy daily life...

If you're ready to take a stand against those dark clouds, safely, naturally and effectively...

### This good news is about to get even better

The key ingredient in Saffronex has been shown to be just as powerful as those mainstream standbys.

And it works for nearly everyone who's tried it!

Those mainstream standbys can't make a claim like that. In fact, if you've gone that route, you know it can take weeks and weeks to feel a difference...if you ever feel a difference at all.

And those potential side effects? YIKES!

Saffronex delivers only safe, natural, powerful mood-boosters, positivity-enhancers and smile-producers to help ensure you can...

- Wake up each morning feeling happy, productive and on your game
- Fully enjoy life's most precious moments—from a home baked cookie to a child's laughter
- Rekindle a healthy, satisfying sex life with your wife or husband—an important factor in any intimate relationship
- Take on life's challenges, big and small, with an open mind, a positive outlook and the confidence you need to succeed

Stop feeling blue and out of sorts...stop letting your worries call the shots...

### Feel like your old self in a matter of weeks—guaranteed!

Part two of the Saffronex formula is an important amino acid called, 5-Hydroxytryptophan, or 5-HTP.

Your body uses 5-HTP to create serotonin—the "feel good chemical" in your brain. So when your levels of serotonin are low, you're likely to feel down, withdrawn and off your game.

But, in an open trial of 107 people, nearly 70% reported a significant improvement in just two weeks without a single negative side-effect.

How's that for an inspiring mood boost?!

But it gets even better still. Because Saffronex also addresses...

### The not-so-surprising link between your heart and your mood

Our hearts are often associated with our emotions.

We speak from the heart, we take things to heart—we can be heartbroken.

Of course we know that, scientifically speaking, our thoughts and feelings aren't actually generated in the heart...but your heart health *does* play a very real role in your mood.

Have you ever heard of homocysteine?

Homocysteine is a potentially harmful chemical, created normally in the body, when we digest proteins.

Homocysteine levels are very closely associated with heart health—the higher the levels, the more dangerous is it for your heart and cardiovascular system.

Your body has natural processes in place to convert it into non-harmful chemicals that it can actually use.

But age and nutrient deficiencies can slow or stall that natural process allowing dangerous levels of homocysteine to build up in your body.

Luckily enough, getting homocysteine levels under control is actually pretty easy.

Research shows that vitamins B12 and folate can work wonders for ensuring healthy homocysteine levels.

**But here's the most interesting part of the homocysteine story.**

A 2002 study, published in the *American Journal of Psychiatry*, looked at 3,884 seniors and found a strong link between homocysteine levels and mood.

Those with the highest homocysteine levels were most likely to feel down and out.

And, since we know that vitamins B6, B12 and folate can help lower homocysteine levels, it wasn't surprising that those same folks were also deficient in both.

A 2007 article, in the same journal, further confirmed this correlation. Adding, further, that folate is needed to help produce feel-good neurotransmitters like serotonin and dopamine, in the brain.

### EUREKA!

#### Vitamins B6, B12, and folate can help lower homocysteine, lift your mood, and bring back your smile

And that's why these three nutrients round out the powerful, mood-boosting arsenal in each daily dose of Saffronex.

**With a welcome boost in heart health as an exciting side benefit.**

In a matter of weeks, you'll feel the doom and dread begin to lift...

- You'll look forward to getting out and socializing...
- You'll enjoy healthy, fulfilling relationships (and a renewed and exciting sex life)...
- You'll feel productive, engaged, and on top of your game...

**Big challenges will feel small...and small challenges will seem insignificant...as you lift those blues and banish those dark clouds.**

### You can be the first to try Saffronex and feel the difference for yourself—guaranteed!

Studies show that the ingredients in Saffronex go to work in as little as two weeks!

Then, with each passing day, you can feel more and more like yourself.

Find the joy in life's little moments...the smell of fresh roasted coffee...children's laughter...stop to smell the flowers or smile at a neighbor.

Plus, if you respond today, you can be one of the very first to try it, absolutely risk-free.

No one likes to feel down and out, grouchy or unmotivated. And Saffronex means, you don't have to anymore.

I know you've probably tried other solutions and came away disappointed—I understand your skepticism.

### That's why I'm giving you an extra-long, 6 months to put Saffronex to the test without risking a dime

If you don't feel a renewed sense of motivation, excitement and positivity...

If Saffronex doesn't help you feel like your old self—chasing away those blues, banishing those dark clouds and feelings of "blah"...

If you don't feel the veil of sadness lift and disappear for good...

**You have a full 6 months to send it back for a full refund of the purchase price, it's that easy.**

[You don't have to wait—it's as easy as clicking here.](#)

There's no risk. No side effects. And the ingredients in Saffronex are clinically shown to start working in as little as two weeks.

[Stop living under the weight of sadness, dread and negativity. Let Saffronex lift your spirits and restore a positive, happy mood today!](#)
